A Calculation Tool Estimating Labor, Time and Wages For Hand-Counting Paper Ballots

The number of seconds needed to count each contest on each ballot (includes 20 minutes training)	10	
The average number of contests on the ballot	2	
The average number of ballots cast per Election District	294	Registered voters per Election District
The number of Election Districts	12	440
The % of ballots cast at Election Districts	95.47	Election District turnout
The % of absentee ballots cast (this auto-fills to make 100%)	4.53	66.86%
The number of registered voters in the County	5277	
The number of paid counters/observers per counting team	4	Total ballots cast, all Election Districts
The hourly pay rate per counter/observer, in dollars	10	3528
Formula estimates labor, cost and time to hand-count paper ballots in the polling place on election night		Total ballots cast, mail-in
Total contests to count (contests per ballot x ballots cast per Election District) =	588	167
Total seconds needed to count all contests per Election District at 10 seconds per contest =	5880	Total ballots cast Countywide
The number of hours a 4-person team is needed for counting on election night =	1.63	3695
Paid counters/observers needed Countywide, if all Election Districts use only one counting team =	48	Voter turnout
Total (potential) payroll (counters/observers are encouraged to decline the stipend) =	$784.00	70.03%
