WITNESS TO A CRIME

A CITIZENS' AUDIT OF AN AMERICAN ELECTION

Richard Hayes Phillips

The 2004 presidential election in Ohio, the state that decided the election, was *rigged*.

Richard Hayes Phillips has been the leading investigator of the fraudulent 2004 presidential election in Ohio. His work was relied upon by **John Conyers** in challenging the Ohio electors in Congress, by **Robert F. Kennedy, Jr.** in his article for Rolling Stone magazine, and by Algenon L. Marbley in issuing his federal court order protecting the ballots from destruction. Assisted by teams of volunteers equipped with digital cameras, Phillips amassed some 30,000 images of forensic evidence. Then he analyzed it all himself, examining 126,000 ballots, 127 poll books, and 141 voter signature books from 18 counties in Ohio.

Phillips began investigating the Ohio election when he received an unsolicited e-mail containing obviously erroneous election results from Cleveland. He quickly found that hundreds of votes in certain precincts had inexplicably shifted from John Kerry to other presidential candidates. This made him a witness to a crime, with a duty to investigate further and to present his findings publicly. The result is the book, *Witness to a Crime*. It is an investigative report and eyewitness history, the document of record for what really happened in Ohio.

Copies of the book will be available for purchase and signing.
